

Data Center Relocation Services

Enabling Your IT Infrastructure

Moving your data center to a new location, whether it is down the hall or around the world is a significant undertaking which takes careful planning, strong project management and a proven methodology to complete without impacting business operations.

Leveraging 20 years of experience managing, supporting and optimizing multivendor data center environments, Akibia has the expertise to effectively and efficiently complete your data center move, from dismantling and moving systems, to tracking and testing and bringing the systems back online. Whether consolidating data centers, moving to a new location to reduce power and facility costs or moving as part of a disaster recovery plan, Akibia is the right partner to help make your move a success.

Managing and Simplifying Multivendor Data Center Moves

The benefits of an integrated or centralized data center environment can be considerable, and we strive to help customers achieve their relocation goals while concurrently minimizing the cost, downtime and lost productivity they might otherwise incur.

While hardware vendors may limit moves to only their systems, Akibia provides a **single point of contact for relocating multivendor data center environments**. Akibia handles the entire project from planning the move and making recommendations on system consolidation to bringing your systems back online and ensuring the new data center is optimized for performance.

As an independent multivendor maintenance and support provider with twenty years of data center expertise, Akibia is uniquely suited to manage your entire data center relocation. As a result of our in-depth technical expertise in **Sun Microsystems, Hewlett Packard, Compaq, IBM, EMC and Dell** hardware platforms, as well as **UNIX, Linux and Windows** operating environments, you can rest assured that your critical systems will be seamlessly relocated by Akibia. Leading global companies rely on Akibia's Data Center Relocation Services for a variety of reasons:

- **Experienced Project Management** - Akibia will expertly plan and execute your entire data center relocation and assume total accountability for successfully bringing your systems back online.
- **Multivendor Data Center Expertise** - Akibia's expertise in multivendor servers and operating systems allows us to act as a single point of contact for your move.
- **Minimal Downtime** - We partner with our clients to design a relocation plan that minimizes system downtime and the impact on existing business operations.
- **Data Center Optimization** - Akibia can help you address critical data center concerns such as server utilization, performance, capacity planning and consolidation, to ensure your new data center is optimized for performance and supports future growth requirements, while containing costs.

Leverage Akibia's Infrastructure, People and Processes

Akibia's infrastructure of warehouses and testing and repair facilities, our in-depth technical knowledge of data center systems and extensive capabilities in logistics, IT planning and operations, ensure the smoothest data center relocation for our clients. Our services include:

- Pre-move audit to determine the systems to be moved
- Consulting on systems optimization
- Asset Management including cataloging, tracking and storing of systems
- Bar-coding and packaging of systems
- Coordination of insurance and all vendors to ensure seamless move
- De-installation and transportation of systems
- Re-installation and testing of systems

Benefit from Akibia's Suite of Data Center Support Services

As a trusted advisor and partner to our customers, many rely on Akibia's full suite of Data Center Support services which include:

- Multivendor Systems Maintenance
- Proactive Monitoring
- Patch Management
- Hardware Procurement Services

The Akibia Difference

- **Focus on Service** - Founded as an independent services provider, Akibia's cumulative knowledge, expertise, experience and best practices supporting mission-critical data centers enables us to provide the highest standard of service and support for your data center relocation.
- **Customer-centric Culture** - Akibia emphasizes providing excellent customer service. Our TLC² service philosophy motivates every employee to **"Think Like a Customer."**
- **Our Customers** - With 20 years of experience supporting complex, high-availability, mission-critical data centers, we have worked with some of the most demanding data centers in the world, helping clients maximize systems reliability and performance.

About Akibia, Inc.

Akibia provides innovative IT solutions that enable leading companies worldwide to optimize, secure, manage and support their mission-critical data center and security infrastructure. Combining expert consulting, integration and support services with world-class customer service, Akibia helps IT organizations maximize the value of their existing infrastructure, while mitigating risk and reducing complexity. Founded in 1988, Akibia is an independent IT services company with offices throughout the United States and Europe.
